DDI-Net 3.0 · QUICK REPORT

Metformin + Warfarin

DB00331 · DB00682 · DDI-20261015-201821-17568344 · 15 October 2026, 20:18:21 (UTC, UTC+00:00)

DDI-Net is a research prototype — not a medical device and not clinical decision support. The absence of a documented interaction is not evidence of safety. The BIO-GINE score is a research signal of resemblance to documented pairs, not a probability of clinical harm.

Is there a documented interaction?

> ### Evidence source temporarily unavailable
> Nothing was found, but a source that could hold evidence did not respond. The pair cannot be fully assessed.

What could happen?

No supported outcome could be identified from the available evidence. This does not mean the combination is safe.

Why could it happen?

The available evidence does not establish a mechanism for the documented outcomes.

How certain is the information?

Seriousness: Not applicable: no documented outcome. This does not mean the combination is safe.

- DrugBank (local TDC export): 0 record(s) for the pair. No severity and no stated basis.
- FDA labels unavailable now — not part of this analysis. Drug names are searched, not classes; Adverse Reactions sections are not used.
- Source “FDA labels (openFDA)”: unavailable. Its data is not part of this report.
- The service uses one model checkpoint (seed 0) and provides neither a per-pair confidence interval nor an ensemble estimate. Section 5 gives the quality measured on the held-out test instead — an average over many pairs, not confidence in this pair.
- No source gives a severity, and none is assigned here.
- Doses, duration, age, kidney and liver function, other medicines and individual factors are not taken into account.

What does BIO-GINE add?

BIO-GINE is a research model that looks for patterns resembling documented interactions. Its score is not a probability of harm or an individual's risk, and it does not affect the status or the outcomes above.

`Calibrated score: 0.44 · S2`

Important limitation

This platform cannot determine whether a particular combination is safe for an individual. It is a research and educational tool.

The full research report holds every excerpt, the provenance of each statement, the mechanism hypotheses and the model analysis.
